DURATION

60-150 minutes
(According to guest numbers)

REQUIREMENTS

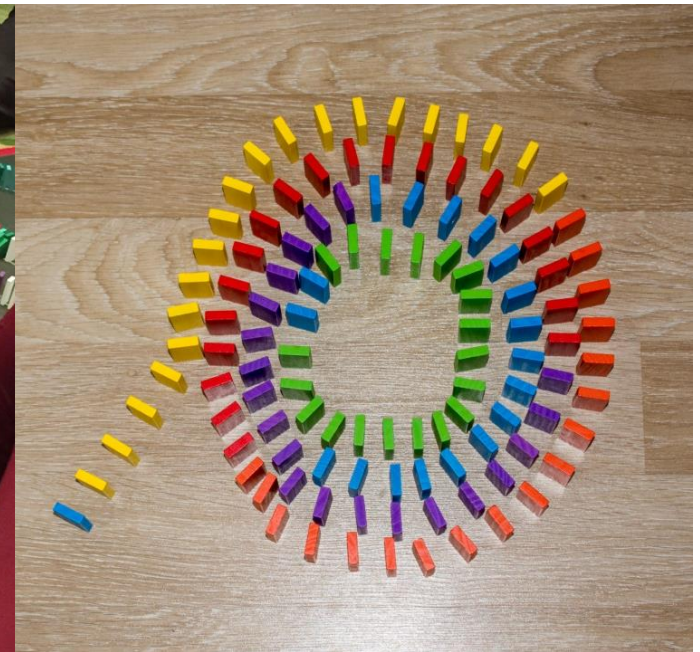

An empty meeting room with
a solid and level floor

GUEST NOS.

8 - 400 guests

EVENT
VIDEO

A steady hand and creative thinking is crucial in this fast-paced collaborative activity! Created to demonstrate the benefits of communication and cooperation between individuals and teams, Kinetic Energy emphasises the benefits of collective input and the power of teamwork.

Divided into teams, each must compete to create an elaborate domino design – you may remember playing with dominoes from your childhood, but never in this manner!

Communication is a fundamental part of this event as all teams must work in collaboration. The event literally builds to a grand finale where all individual elements are brought together and must fit seamlessly to succeed, with the teams uniting to achieve their common goal.

The message behind the event is to underline the importance of everyone's contribution to a group or team effort, as it only takes one bad or reckless move to cause the whole to fail with devastating consequences!

"An excellent engaging team building activity, that really brought the team together"
Mars

KINETIC ENERGY

DETAILS

The group are divided into teams of between four and six people, with each team receiving identical equipment consisting of:

- **An instruction booklet**
- **1000 coloured dominoes**
- **A 4ft square base & a 4ft long connecting ramp**
- **Stop-blocks to guard against clumsiness!**
- **Various other props including raised platforms for any guests with limited mobility**

After a briefing from our Event Managers and introductory video, each group is tasked with designing the most elaborate domino rally they can use as much of their equipment as possible.

This must be built on their base and connected to the previous and next group by the connecting ramps, with a booklet of ideas to help with creative solutions if required.

The groups will communicate with each other regarding the ramps that join their work together and come up with a joint design for that portion – before all joining together for the grand finale.

KINETIC ENERGY

Specifically addresses and highlights the following Learning Outcomes:

Time Management

Analysis of the task and breaking it down into elements to ensure that the team is organised to complete the challenge within the time allotted.

Collaboration

The teams must work closely together in a structured and cooperative way, as not doing so will result in failure in the task set!

Communication

Effective communication within the team with every member's input considered to draw out the most effective solution.

Teamwork

Co-operation and communication within the team highlights the essentiality of internal communication and the understanding of individuals' roles and skills to enable the team to achieve success.
