

# SANTA'S CRAZY WORKSHOP

**DURATION**  
120 minutes

**GUEST NOS.**  
30 – 300 guests

## REQUIREMENTS

Please note this activity does not require ovens, hobs, or our cookery tables, we use venue tables for this activity.

**A festive, fast, fun, crazy and creative activity that will test all who participate. This challenge requires engineering, innovation, technical skills, teamwork, and leadership to succeed and thrive.**

A warm welcome is given from our host who will engage the guests and teams in a rather noisy icebreaker challenge. The head chef will then be introduced, beware he is a grumpy gringe and may need cheering up by the group! He may pick members of the group members who step out of line to assist him in the demonstrations so watch out! After the demonstration on some of the technical aspects of the activity teams will work together to construct a winter wonderland of different creations!

To conclude our grumpy gringe chef will judge the teams winter wonderlands, beware the chef has been known for knocking over poor efforts that may fail his high expectation in a structural stress test! (all done in good humor and always gets a giggle!)
