60 – 120 minutes  
(According to guest numbers)

## REQUIREMENTS

Dependent on  
guest numbers

## GUEST NOS.

10 – 140

SEE THE EVENT IN  
ACTION!

**Work together to win the race! Race to Success is designed to encourage teams to work together whilst thinking through a project.**

From an initial briefing, teams will be required to build their own go-kart using the kit provided to them – each team player will find an area in which to excel.

No instructions are included so inter-team communication is key to successfully completing this part of the challenge and, of course, our experienced event crew will be on hand to help teams along the way.

Once built, teams will then race against the clock to strip and rebuild their go-karts in the hope of winning points as the fastest pit crew.

With the Pit Stop challenge element complete the teams will then test their 'driving' skills with their 'road-worthy' vehicle in a series of challenging trials!

*"I'm very happy to tell you that the "Race to Success" activity was a complete and utter success!! Everyone had a great time and thoroughly enjoyed it. I'll definitely recommend this activity if ever I'm asked, and if I'm arranging events in the future, I'll be sure to contact you." Mitie*

# RACE TO SUCCESS

## DETAILS

### THE MOT

With the machines constructed, it's time for the MOT where a pass is paramount, allowing teams to take their karts to the track for a series of races to test their driving skills and engineering flair.

### PIMP MY KART

Now you need to make your kart look the part! There are big points on offer for the most creative body kit!

### THE RACE

It's time to test them where it really matters, in the Team Trials! Teams will compete against each other in a series of tests, each involving a different skill group:

**Pit Stop Challenge** Racing against the clock and the other teams to rebuild their karts in the quickest time possible.

**Parallel Park** Not the most popular of manoeuvres!

**Hill Climb** Not Mount Everest but no bump in the road either!

**Speed Slalom** A true test of manoeuvrability and steering!

### THE FINALE

Points will be awarded to the winners and runners-up in each of these trials. Winner's medals will be presented at the finale of your event to some lucky teams!

The event includes all of the following:

- Bolt together precision machines in a variety of driving and steering combinations
- Individual driving competitions including skill & speed events
- Basic tools
- Body Styling Kit
- Safety equipment
- Mechanics and Event Manager

No grease or oil is used, and elbow grease is reduced to a minimum!
